### JUNE: Men’s Health Awareness Month

The purpose of Men's Health Month is to heighten the awareness of preventable health problems and encourage early detection and treatment of disease among men and boys because **HEALTHIER MEN LIVE LONGER!**

Alarming statistics show that men's health is at great risk. On average, men die almost 6 years younger than women and suffer higher mortality rates for the top causes of death. The lives of hundreds of thousands of men will continue to be threatened unless immediate action is taken to combat this growing crisis.

**Because men’s health impacts our mothers’, sisters’, wives’, and daughters’ health, it impacts our family’s health!** Heightened awareness of preventable health problems and early detection and treatment of diseases among men and boys will result in improved health and wellness of our men and families.
